

A cross-sectional diagram of a thin film stack. It consists of four horizontal layers. The top layer is light gray and labeled 'Al'. The second layer is orange and labeled 'TiO₂ (40 nm)'. The third layer is yellow and labeled 'CsPbI₂Br (300 nm)'. The bottom layer is light blue and is unlabeled. The entire stack is enclosed in a black rectangular border.

Al

TiO₂ (40 nm)

CsPbI₂Br (300 nm)

Sample: 40TiO₂
